TEACHING PRESENT PERFECT TENSE
BY USING CONTEXTUAL TEACHING AND LEARNING
(An Experimental Study at the first Grade of SMK Grafika
Yayasan Lektur Lebak Bulus Jakarta Selatan)

A “Skripsi”
Presented to the Faculty of Tarbiya and Teachers Training
in Partial Fulfillment of the Requirements
For the Degree of S.Pd. (Bachelor of Arts) in English Language Education

**People works at many different jobs**
A businessperson works in an office. He plans business activities. He prepares reports and goes to meetings. He learns about buying, selling, and producing things. A businessperson must hire workers to help him.

A secretary writes letters, answer the telephone, and meets people. She uses a typewriter every day. She puts papers away in the file cabinet. She stands between her boss and her visitors. She helps her boss to plan his and to finish his work.

Teachers work in school. They help their students to learn. They order books, explain lesson, give homework, and correct papers. At the end of the term, they grade their students.

**Rescue workers saved four people**
Rescue workers pulled a man, a woman, and two children from this cold, rushing water. The mother and two daughters got into trouble first. Their car drove off the road into the water. The man, a truck driver, almost died when he tried to save them.

The trouble started when Mrs. Leslie lost control of her car on winding mountain road. The car fell down thirty feet from the road into the water. It rolled over once and landed right side up in the rushing water. All people wearing their seatbelts. Nobody was hurt by the fall. However, they couldn’t leave the car. The water outside was too cold and too fast for safe swimming.

The rescue started almost immediately. Another driver told police about the trouble. The police called special rescue workers and a truck to pull the car out.

Next the other rescue workers arrived. They put on special suits to stay warm. They bought safety ropes, life jackets, tire tubes, and warm blankets. First they pulled the people out of the back window onto the top of the car. Then they swam with each person to shore. They saved Mr. Ruter, Mrs. Cady and the little girls.

Finally all the people went to the hospital. Nobody was hurt badly. The rescue workers said that they all were very lucky to be alive.
The kites are flying high

This girl is holding a kite. She’s running as fast as she can, and the kite is rising into the air. While running, she’s letting out string. The kite is rising higher and higher. Occasionally, small children let go of their kites, and then kites fly out of view.

The second kite is flying over a tree. When the wind blows hard, it’s more difficult to fly kites. This father is helping his little girl, and he’s having a very good time. Happy families often play together.

This man is having a little trouble with a “kite-eating tree”. He’s climbing the tree to get his kite down. Sometimes kites break when they get caught in trees.

These girls are trying to fly kites, too. They’re having fun, but one of them is getting caught in the string. The other girl is laughing too hard to help her friend. This kind of trouble seldom spoils anybody’s fun, but it often breaks the kite string.

This woman has lost her job

Mrs. Clark and her daughter Sarah have been out shopping, and they’ve just returned home. They bought Sarah a new sweater, and she’s already put it on. It’s so new that they haven’t even removed the tag yet.

Mrs. Clark has just opened a letter, and she’s received bad news. She’s lost her job! For the past year she’s worked as a private secretary for a rich musician. Now the musician has decided to stop working, and he’s asked Mrs. Clark to find another job. Mrs. Clark is the only money earner in the family, since her husband is no longer living.

The letter has upset Mrs. Clark very much. She’s crying. She’s recently bought a new house, a new car, and many new clothes for her job. She hasn’t paid for them yet. Now she may not be able to pay for them, because she hasn’t saved much money.

Sarah has heard the bad news, but she really doesn’t understand much about money. She’s more worried about her mother. Mrs. Clark has never cried in front of her daughter before.
APPENDICES
**BIOGRAPHY**

Iim Imaroh, was born in Cirebon, on July 20th 1983. She was the fourth daughter from married couple of Ahmad Faqih (alm) and Rohmah. She had two sisters and five brothers. She had been being the student of English Department Syarif Hidayatullah State Islamic University for eight years. She was graduate of MAAI (Madrasah Aliyah Agama Islam) that refers to Islamic Senior High School Mertapada, Cirebon, academic year 2000/2001. Formerly, in 1989 she began her study at MI (Madrasah Ibtidaiyah) that refers to Islamic Elementary School Mertapada, Cirebon. She continued her study at MTsAI (Madrasah Tsanawiyah Agama Islam) that refers to Islamic Junior High School Mertapada, Cirebon in 1995.

When she was at Elementary School, Junior High School, and Senior High School, she was active in ‘reciting the Holy Qur’an and Kitab Kuning’ as a part of extracurriculars in her school. This extracurricular is primer extracurricular that should each student followed. She has followed recited Qur’an until Warsy. Also, she has followed recited Kitab Kuning, namely: ‘Imrithi, Sulamtaufiq, Fathul Mu’in, Alfiyah and ‘Uqudullujjain.

To practice her English to be better, at second semester of her study at university, she followed the TTP (Teacher Training Program) for teaching children at NEC course. She has taught at NEC course after TTP for 4 years. She also taught in SMA-DT that refers to Senior High School-Daarut Tauhiid Jakarta as an English teacher in 2006. At the same time, she taught as an English Private teacher and SDIT An-Nur (Sekolah Dasar Islam Terpadu An-Nur) in Bekasi for 2 years.

Her life principle is ‘follow your heart’. When we stand in difficult condition, then, we have to make decision, we have to choose the best one, by following your heart, we will decide and choose the best one easier.
ABSTRACT

Imaroh, Iim. 2009. *Teaching Present Perfect Tense by Using Contextual Teaching And Learning (An Experimental Study at the first Grade of SMK Grafika Yayasan Lektur Lebak Bulus Jakarta Selatan)*, Skripsi, English Department, Faculty of Tarbiyah And Teachers Training, Syarif Hidayatullah State Islamic University, Jakarta.

Advisor: Syauki, Drs. M.Pd.

**Key words:** Present Perfect Tense and Contextual Teaching and Learning.

The purpose of this study is to describe about application of contextual teaching and learning in teaching present perfect tense at the first grade of SMK Grafika Yayasan Lektur Lebak Bulus Jakarta Selatan.

This study is categorized as quantitative descriptive analyses, by doing pre-experiment research, that is; pre-test before taught by using CTL and post-test after taught by using CTL to the students. It is to gain the information about the effectiveness of using CTL in teaching present perfect tense.

The data collected in this research analyzed by using t-test. According to the result of statistical calculation, it is obtained the value of $t_0$ (t observation) 59.217, and the value of $t_t$ (t table) from the df (40) on significance level 5% and 1% are 2.02 and 2.71. It means that the value of $t_0$ is higher than $t_t$. Based on the result, the null hypothesis ($H_0$) which says that there is no a significance learning achievement between after and before students taught present perfect tense by using CTL is rejected. It means that alternative hypothesis ($H_a$) which says that there is a significance learning achievement between after and before students taught present perfect tense by using CTL is accepted.

Based on the finding of the study, it can be concluded that using CTL in teaching present perfect tense is more effective. By using CTL the students are feel more interesting, active and enjoy doing activities in the class. They get opportunities to explore their knowledge and applicant in daily lives.
ABSTRAK

Pembimbing: Syauki, Drs. M.Pd.

Kata Kunci: Kalimat Present Perfect dan Contextual Teaching and Learning.

Penelitian ini bertujuan untuk menggambarkan tentang penerapan dari metode kontekstual atau CTL dalam pengajaran kalimat present perfect pada kelas I di sekolah SMK Grafika yayasan lektur lebak bulus Jakarta Selatan.

Penelitian ini dapat dikategorikan sebagai penelitian kuantitatif deskriptif dengan menggunakan penelitian percobaan yaitu: pre-tes sebelum diajar dengan menggunakan metode CTL dan post-tes sesudah diajar dengan menggunakan metode CTL. Penelitian ini bertujuan untuk mendapatkan informasi tentang efektivitas metode CTL dalam pengajaran kalimat present perfect.

Pengumpulan data dalam penelitian ini dianalisis dengan menggunakan t-test formula. Menurut hasil penghitungan statistic, didapat nilai to (t observasi) sebesar 59,217 dan nilai tt (t table) dari db (40) pada level signifikan 5 % dan 1 % adalah sebesar 2,02 dan 2,71. Ini menunjukkan bahwa nilai to lebih besar dari nilai tt. Berdasarkan hasil tersebut, hipotesis nihil yang menyebutkan bahwa tidak ada hasil pembelajaran yang signifikan antara sebelum dan sesudah siswa diajar kalimat present perfect dengan menggunakan CTL ditolak. Ini menunjukkan bahwa hipotesis alternatif yang mengatakan bahwa ada hasil pembelajaran yang signifikan antara sebelum dan sesudah siswa diajar kalimat present perfect dengan menggunakan CTL diterima.

Berdasarkan hasil penelitian, dapat disimpulkan bahwa penggunaan CTL dalam pengajaran kalimat present perfect lebih efektif. Dengan menggunakan CTL siswa merasa lebih tertarik, aktif dan menyenangkan di kelas. Mereka mendapatkan kesempatan untuk mengeksplorasi pengetahuan mereka dan menerapkannya dalam kehidupan sehari-hari.
Acknowledgment

First of all, praise is to Allah, the Cherisher and Sustainer the world, then the writer would like to thank to Allah for all chances have been given to observe her world with full guidance and help to pass it through. And May peace and blessings of Allah be upon the Seal of the Prophet, the messenger of Allah, Muhammad, his family and all his companions and followers.

Secondly, the writer would like to thank to her parents; Ahmad Faqih (alm) and Mrs. Rohmah, and for her parents in law; Mr. Supriatna and Mrs. Siti Maryam for their prays, love and supports. Then, the writer would like to thank to: her sisters and brothers, sisters in law and brothers in law, and her nephews and niece for their love. Also, the writer would like to thank to her husband; Agus Bismawan, for his motivation, support and love, and for the writer’s daughter Putri Nadya Safira who the writer loves so much.

Then, the writer would like to say her deepest gratitude to her advisor, Mr. Syauki for his valuable guidance, comments, and suggestions for the completion of her skripsi and for his academic guidance during her study. Besides, good services from Mr. Syauki as the head of English Department. The writer really respects him. Also, the writer would like to thank to: Mrs. Neneng Sunengsih, S.Pd. as English secretary, for good services and her academic guidance.

More over, the writer would like to thank to: All lectures in English Department, for their academic guidance. All the staffs of the faculty of education and teachers training, for good services. All the library staff of the faculty of education and teachers training, for borrowing books.

Also, the writer would like to thank to Prof. Dr. Dede Rosyada, MA. the dean of Faculty of Tarbiyah and teachers training.

For Mr. Turyono, the headmaster of SMK Grafika, Mrs. Sadiyem, the staff of SMK Grafika, English teacher, and all of the first grade students of SMK Grafika who have gave the writer a chance to do the research in SMK Grafika. Thank to all their kindness.
Finally, to Eka Munifah and her husband, Pepenk, Ina, and all of her friends who are not mentioned one by one.

The writer realizes that her skripsi is not perfect yet. But she hopes her skripsi may open another research related to Grammar. Therefore, various critics and suggestions are needed to make it better.

Jakarta, June 2009

The writer

CHAPTER I
INTRODUCTION

This chapter presents and discusses the Background of the study, Scope and Formulation of the Problem, Objective of the Study, Significance of the Study, Hypothesis, and Operational Definitions.

A. Background of the study

English is the international language of the present historical period. As a consequence, English serves for many people as a bridge into the higher education, science, international trade, politics, tourism, or any venture.

In Indonesia, an English subject is very familiar. From kindergarten until university students learn English. Students who learn English meet a number of problems. They should master on language skill and language sub-skill/language competence. Language skills are: listening, speaking, reading and writing. Language sub-skills are: vocabulary, grammar, pronunciation, spelling, and punctuation.

Based on these statements, students who learn a foreign language has many demands. They should master on every language part. Finally, the teacher should use methods in teaching process in order to decrease problems.

When students learn language they need to learn grammar. Even though, “the place of grammar in the teaching of foreign language is controversial”.¹

The knowledge of grammar is one of the important factors that student should master, in order to be able to listen, speak, read, and write correctly. Grammar is needed to have a mastery of four basic language skills. It is concerned with Patricia Osborn said that “Understanding grammar can put you more in

control of your language and help you become more effective when you speak, write, and even read”.

By studying grammar, we study how a language works. A grammar guide provides a breakdown of our language, showing how its various parts operate and how they fit together into sentences; it is concerned with H. Douglas Brown said that “grammar tells us how to construct a sentence (word order, verb, and noun systems, modifiers, phrases, clauses, etc.).” So, “a study of grammar teaches you the basic construction and operation of all sentences.”

Based on these statements above, we can say that grammar is very important to teach; in order the students who learn English can minimize their problem in using English as communication, in comprehending the reading text or in writing.

Besides grammar, the teachers who teach English have to use methods. Basically, a method or an approach will be usually influenced by a view or a theory of a language. It is concerned with Mackey. He said that “differences ideas on language learning will affect both the method and the teaching of language.”

In teaching a foreign language, there are many approaches or methods, for example: grammar translation method, audio-lingual method, situational approach, total physical response, communicative language teaching, cooperative learning, contextual teaching and learning, and so on.

Nowadays, contextual teaching and learning is one of a new method which socialized in Indonesia. Contextual Teaching and Learning (CTL) is a learning concept, which helps teachers to chain between the teaching material and the real situation faced by the student. In addition, it can help student to apply the knowledge in the real world. According to this concept the learning process goes naturally. It is not only students learn and do it, but also teacher transfer the

---

4 Patricia, ... p.3.
knowledge to students. The learning strategies are more important than the outcomes.

Through this context students need to understand the meaning of study, its advantage, the status of student, and how to reach it. They should realize that what they are learning is pretty useful for their future. They learn the useful things for themselves and try to reach it. So, they will need teachers as the director or the guide.

In contextual class; teacher’s duty is helping students to reach their goals. It means teachers will be more focused on the strategies than the information transfer. The other teacher’s duty is managing the classroom as teamwork that together to find something new for the class.

Basically, contextual approach is only a learning strategy. Like the other learning approaches, contextual is developed by a goal that has to be more productive and meaningful. Contextual approach can be run without changing a curriculum used by school.

In this research paper, the writer will discuss contextual teaching and learning as a method in teaching present perfect tense. Why does she want to discuss it? Because she finds that nowadays there is willingness to return to a thought, that students will learn better if the condition of study is naturally set up. Then, why does she take the present perfect tense as a topic? Because she finds that, there are some difficulties in learning present perfect tense. It doesn’t like simple past which has definite time. Because of these matters, the writer entitles this research paper: Teaching Present Perfect Tense by Using Contextual Teaching and Learning (An Experimental Study at the first Grade of SMK Grafika Yayasan Lektur Lebak Bulus Jakarta Selatan).

B. Scope and Formulation of the Problem

Through this paper, the writer would like to focus on ‘Contextual Teaching and Learning’ as a method in teaching ‘present perfect tense’ in SMK Grafika Yayasan Lektur Lebak Bulus Jakarta Selatan. The writer wants to know
the effectiveness of contextual teaching and learning as a method in teaching present perfect tense.

The formulation of the study in this research paper is “Is Contextual Teaching and Learning (CTL) effective in teaching present perfect tense?”

C. Objective of the Study

The writer would like to know the effectiveness of the application of Contextual Teaching and Learning in teaching present perfect tense.

D. Significance of the Study

After finishing her study, the writer hopes that, this research paper will be useful for the teacher, the student and other researcher. For the teacher; the result of this research is expected to be able to give contribute about how to teach present perfect tense based on the contextual teaching and learning. For the student; the result of this research is expected to make students easier in learning grammar. Then, for other researchers to continue about teaching grammar based on the contextual teaching and learning.

E. Hypothesis

The statistic hypothesis states:

1. Alternative hypothesis (\(H_a\)) : There is a significance learning achievement between after and before students taught present perfect tense by using CTL.

2. Null hypothesis (\(H_0\)) : There is no a significance learning achievement between after and before students taught present perfect tense by using CTL.
F. Operational Definitions

For clarification, some terms in this study need to be defined as follows:

1. SMK Grafika Yayasan Lektur is the acronym of Vocational high school Grafika Yayasan Lektur that refers to “Sekolah Menengah Kejuruan Grafika Yayasan Lektur” under the supervision of the national education department (Departemen Pendidikan Nasional).

2. Contextual Teaching and Learning refers to a range of teaching and learning activities that enable students to reinforce, expand, and apply their academic knowledge and skills in a variety of in school and out-of-school settings in order to solve simulated or real world problems.

3. Present perfect tense is a part of grammar that is commonly used in conversation, letter, newspaper, television, radio and report.
CHAPTER II
THEORETICAL FRAMEWORK

This chapter presents and discusses the theory of the research. It consists of the Present perfect tense, Contextual teaching and learning, and Teaching present perfect tense by using CTL.

D. The Present Perfect Tense

1. The Form of Present Perfect Tense

Structurally the term perfect signifies that a form of have accompanies a verb as an auxiliary. Semantically, according to Marcella Frank, present perfect tense shows a time completed in relation to the present. On the other hand, A.J. Thomson and A.V. Martinet said that the present perfect is formed with the present tense of have + the past participle. And for negative is formed by adding not to the auxiliary. The interrogative is formed by inverting the auxiliary and subject.

Basically, present perfect tense is formed by using the auxiliary verb of have and the past participle from of the main verb (have/has + verb-ed or form of irregular verb) and it is commonly accompanied by definite time words such as since and for. Example:

- They have moved into a new apartment (regular verb)
- We have met many people since we came her in June (irregular verb)

Therefore we can formulate it as follow:

a. Affirmative

---

7 Marcella Frank, Modern ..., p. 77.
1) To make an affirmative statement, the verb other than be we use the following formula:

\[
S + \text{have/has} + \text{past participle (V3)} + (\ldots)\]

**Example:**

<table>
<thead>
<tr>
<th>Subject</th>
<th>Have/has</th>
<th>V3</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>have</td>
<td>done</td>
<td>my homework</td>
</tr>
<tr>
<td>The polices</td>
<td>have</td>
<td>arrested</td>
<td>the thief this week</td>
</tr>
<tr>
<td>Jane</td>
<td>has</td>
<td>studied</td>
<td>English</td>
</tr>
<tr>
<td>He</td>
<td>has</td>
<td>read</td>
<td>Harry Potter for many times</td>
</tr>
</tbody>
</table>

2) To make an affirmative statement for the verb be we use the following formula:

\[
S + \text{have/has} + \text{been} + \text{substantive (adverb of place)} + (\ldots)\]

**Example:**

<table>
<thead>
<tr>
<th>Subject</th>
<th>Have/has</th>
<th>been</th>
<th>substantive (adverb of place)</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>have</td>
<td>been</td>
<td>at home</td>
<td>for many days</td>
</tr>
<tr>
<td>The polices</td>
<td>have</td>
<td>been</td>
<td>angry</td>
<td>for 2 hours</td>
</tr>
<tr>
<td>Jane</td>
<td>has</td>
<td>been</td>
<td>in Singapore</td>
<td>this week</td>
</tr>
<tr>
<td>He</td>
<td>has</td>
<td>been</td>
<td>there</td>
<td>since 5 o’clock</td>
</tr>
</tbody>
</table>

As the writer said above, the basic form of the present perfect tense: *have/has + the past participle*, we use *have* with *I, you, we, they* or *a plural noun* (e.g. students). And we use *has* with *he, she, it* or *a singular noun* (e.g. John). With pronouns, *have* is contracted to apostrophe +ve (‘ve), and has is contracted to apostrophe +s (‘s). Have and has (used as an auxiliary verb, not as main verb) are usually contracted with personal pronouns in both speaking and informal
writing. Have and has are often contracted with nouns and other words in informal speaking but not in writing.\(^9\)

Example:

Mary has never been there \(\rightarrow\) Mary’s never been there

You have been there \(\rightarrow\) You’ve been there

b. Negative

1) To make a negative statement, the verb other than be we use the following formula:

\[
\text{S} + \text{have/has} + \text{not} + \text{past participle (V3)} + (\ldots)\]

Example:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Have/has</th>
<th>not</th>
<th>V3</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>have</td>
<td>not</td>
<td>done</td>
<td>my homework</td>
</tr>
<tr>
<td>The polices</td>
<td>have</td>
<td>not</td>
<td>arrested</td>
<td>the thief this week</td>
</tr>
<tr>
<td>Jane</td>
<td>has</td>
<td>not</td>
<td>studied</td>
<td>English</td>
</tr>
<tr>
<td>He</td>
<td>has</td>
<td>not</td>
<td>read</td>
<td>Harry Potter for many times</td>
</tr>
</tbody>
</table>

2) To make a negative statement for the verb be we use the following formula:

\[
\text{S} + \text{have/has} + \text{not} + \text{been} + \text{substantive (adverb of place)} + (\ldots)\]

Example:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Have/has</th>
<th>been</th>
<th>not</th>
<th>substantive (adverb of place)</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>have</td>
<td>been</td>
<td>not</td>
<td>at home</td>
<td>for many days</td>
</tr>
<tr>
<td>The polices</td>
<td>have</td>
<td>been</td>
<td>not</td>
<td>angry</td>
<td>for 2 hours</td>
</tr>
<tr>
<td>Jane</td>
<td>has</td>
<td>been</td>
<td>not</td>
<td>in Singapore</td>
<td>this week</td>
</tr>
<tr>
<td>He</td>
<td>has</td>
<td>been</td>
<td>not</td>
<td>there</td>
<td>since 5 o’clock</td>
</tr>
</tbody>
</table>

c. Interrogative

1) To make an interrogative affirmative statement for the verb other than be, we put have/has before the subject. We use the following formula:

\[
\text{Have/has + S + past participle (V3) + (………)}
\]

Example:

<table>
<thead>
<tr>
<th>Have/has</th>
<th>Subject</th>
<th>V3</th>
<th>Question</th>
</tr>
</thead>
<tbody>
<tr>
<td>have</td>
<td>I</td>
<td>done</td>
<td>my homework?</td>
</tr>
<tr>
<td>have</td>
<td>The polices</td>
<td>arrested</td>
<td>the thief this week?</td>
</tr>
<tr>
<td>has</td>
<td>Jane</td>
<td>studied</td>
<td>English?</td>
</tr>
<tr>
<td>has</td>
<td>He</td>
<td>read</td>
<td>Harry Potter for many times?</td>
</tr>
</tbody>
</table>

2) To make an interrogative affirmative statement for the verb be, we put have/has before the subject. We use the following formula:

\[
\text{Have/has + S + been + substantive (adverb of place) + (………)}
\]

Example:

<table>
<thead>
<tr>
<th>Have/has</th>
<th>Subject</th>
<th>been</th>
<th>substantive (adverb of place)</th>
<th>Question</th>
</tr>
</thead>
<tbody>
<tr>
<td>have</td>
<td>I</td>
<td>been</td>
<td>at home</td>
<td>for many days?</td>
</tr>
<tr>
<td>have</td>
<td>The polices</td>
<td>been</td>
<td>angry</td>
<td>for 2 hours?</td>
</tr>
<tr>
<td>has</td>
<td>Jane</td>
<td>been</td>
<td>in Singapore</td>
<td>this week?</td>
</tr>
<tr>
<td>has</td>
<td>He</td>
<td>been</td>
<td>there</td>
<td>since 5 o’clock?</td>
</tr>
</tbody>
</table>

3) To make an interrogative negative statement for the verb other than be, we put have not/has not before the subject. We use the following formula:

\[
\text{Have not/has not + S + past participle (V3) + (………)}
\]

Example:

<table>
<thead>
<tr>
<th>Have not/has not</th>
<th>Subject</th>
<th>V3</th>
<th>Question</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
4) To make an interrogative negative statement for the verb be, we put have not/has not before the subject. We use the following formula:

<table>
<thead>
<tr>
<th>Have not/has not</th>
<th>Subject</th>
<th>been</th>
<th>substantive (adverb of place)</th>
<th>(……..)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Have not</td>
<td>I</td>
<td>been at home</td>
<td>for many days?</td>
<td></td>
</tr>
<tr>
<td>Have not</td>
<td>The polices</td>
<td>been angry</td>
<td>for 2 hours?</td>
<td></td>
</tr>
<tr>
<td>Has not</td>
<td>Jane</td>
<td>been in Singapore</td>
<td>this week?</td>
<td></td>
</tr>
<tr>
<td>Has not</td>
<td>He</td>
<td>been there</td>
<td>since 5 o’clock?</td>
<td></td>
</tr>
</tbody>
</table>

2. **The Use of Present Perfect Tense**

In contrast with the past tense, which denotes definitely completed past time, the present perfect tense expresses indefinite time that begins in past and extends to the present. It is a special kind of past time that ends with the moment of speaking. And event may continue beyond the present moment of speaking, but the statement is not concerned with this segment of time.10

According to Raymond Murphy in *Grammar in Use*, “The present perfect tense is used when we talk about a period of time that continues up to the present.”11 For example: Tom and Ann are talking about the period between a short time ago and now. So they say: *Have you heard?*

And as stated in Understanding and Using English Grammar written by Betty S. Azar, the present perfect expresses the idea that something

---

happened (or never happened) before now, at an unspecified time in the past. The exact time it happened is not important. Example: *I have already seen that movie.* If there is a specific mention of time, the simple past is used: *I saw that movie last night.*

In addition, the present perfect tense also expresses the repetition of an activity before now. The exact time of each repetition is not important. Example: *We have had four tests so for this semester.* The present perfect tense also, when used with *for* or *since,* expresses a situation that began in the past and continues to the present. In the example, notice the difference between *since* and *for.* *Since* is used for a particular time and *for* is used to duration of time. Example: *I have been here since seven o’clock. I have learned English for 6 years.*

On the other hand, present perfect tense may be used to be a sort of mixture of present and past. It always implies a string connection with the present and is chiefly used in conversation, letter, newspaper, television, radio and report.

As stated by Marcella Frank in his book Modern English, the present perfect tense represents time that begins in the past and extends to the present, either in factual fact or in the mind of the speaker. It is not used with definite time words like yesterday or last year.

The kinds of past to present time that possible are:

a. Actual past-to-present time. An actual event starts in the past and continues up to the present. Example: *He has a worked in the same company for ten years.*

b. Psychological past-to-present time. The time exists only in the mind of the speaker. It is the time of the statement itself, not the time of an

---

12 Betty S. Azar, ..., p.29.
13 Betty S. Azar, ..., p.29.
actual event that extends up to the present. Example: *This professor has often praised his students’ ideas.*

The actual time represented by the present perfect usually involves duration of a single act that ends with the moment of speaking or shortly before it. The psychological time denoted by the present perfect tense often involves possible repetition within the past to the present period.\textsuperscript{16}

As stated by Marcella Frank, the expressions of time that mark a past to present event are indicated below:

a. Duration of an event that ends with the moment of speaking (actual time)
   1) Prepositions indicating duration: *since, for.* These are the most common prepositions that express duration with the present perfect tense. Both these prepositions refer to the same past-to-present time span. *Since* gives the beginning point. *For* gives the entire extent of the past-to-present period. Thus, if a person who came to the United States in 1968 and spoke in 1972, he can say either:
   - I have lived in the United States *since* 1968. (With *since*, the beginning point of an extended period is often expressed as a date).
   - I have lived in the United States *for* four years. (With *for*, the extended time is expressed as a quantity, often with a numeral)
   2) Adverbial expression meaning past-to-present time: so far, up to now, until now, up to the present.
   Example: We have finished five chapters *so far.*

   *Up to now,* we have not found the kind of job.

   We can also add here such expressions as all his life, in her whole life.

   Example: He has lived in New York *all his life.*

b. Frequency within an extended past-to-present period (psychological time)

   The present perfect tense is used with frequency adverbs, that involve repetition; always, often, twice, sometimes, etc.

\textsuperscript{16} Marcella Frank, *Modern …*, p. 78.
Example: He has *always* lived in the United States.

We have *sometimes* gone to the beach, but we have never enjoyed the trip.

Such frequency words usually appear in general statements about events that begin in the past.

c. Recently of an event (actual time)

1) Just (now) already (or yet with negatives and questions), finally, still (negative only).

Example: He has *just* (now) come in.

I haven’t seen that movie *yet*.

The president has *finally* arrived.

2) Recently, lately, of late, in recent years etc.

Example: He has *recently* come out of the hospital.

*Lately*, the news about the war has not been good.

3) Time expression containing this: this week, this month, this year, this Saturday, this morning.\(^{17}\)

Example: He has been quite ill *this year*.

They have gone shopping *this morning*.

From these explanations above, the use of present perfect tense are:

1) To express activities or situations that occurred (or did not occur) before now, at some unspecified time in the past.

2) To express activities that was repeated several or many time in the past. The exact times are unspecified.

3) When the present perfect is used with *since* or *for*, it expresses situation that began in the past and continue to the present.

\(^{17}\) Raymond Murphy, *English*............, p. 30
Here is the table about comparison between present perfect tense and simple past:

### Table 2.1
Some differences between present perfect tense and simple past

<table>
<thead>
<tr>
<th>Present perfect tense</th>
<th>Simple past</th>
</tr>
</thead>
<tbody>
<tr>
<td>I have done.</td>
<td>I did.</td>
</tr>
<tr>
<td>I have smoked 20 cigarettes today.</td>
<td>I smoked 20 cigarettes yesterday</td>
</tr>
</tbody>
</table>

- Expresses the idea that something happened (or never happened) \textit{before now, at unspecified time in the past.}\n
- Expresses the repetition of an activity \textit{before now.}\n
- Expresses a situation that \textit{began in the past and continues to the present.}\n
- The time of present perfect tense is \textit{not specific.}\n
- The simple past indicates that an activity or situation \textit{began and ended at a particular time in the past.}\n
E. Contextual Teaching And Learning

1. The History Background Of Contextual Teaching And Learning

   So far, our education has dominated with the idea that knowledge is a set of facts that the students should memorize concepts. For example, the traditional approach, teacher comes to class and then teach by writing on the whiteboard. After that, teacher asks the students to memorize what they have written. This process is material oriented. It is succeed only in competing for ‘short-term memory’ but it fails help learner to solve the problem in their long lives. Thus, it needs a new learning strategy that pushes students to construct knowledge by themselves.

   According to Howard Gardner: “Many of today’s students do not actually understand what they learn. For many students, education has become nothing more than drill and response; there is no relevance for the materials the students are expected to learn.”\textsuperscript{18} From the quotation above; there is willingness to return to a thought, that students will learn better if the condition of study is naturally set up. Learning will be meaningful if student “experiencing” not just “knowing”. Learning which target orientation

\textsuperscript{18} http://www.ncrel.org/sdrs/areas/issues/students/atrisk/at4lk3.htm
succeeds only in competing for ‘short-term memory’ but it fails help learner to solve the problem in their long lives. That has happened in our school.

Contextual teaching and learning is a concept of learning which help the teacher to construct the subject with real world and pushes students to make connection between their knowledge and its application in daily lives as member of family and citizens.

Contextual teaching and learning is a new method, but it is not a new thing. In 1916 a philosopher John Dewey introduced a progressivism philosophy that related on experience and students’ interest.\textsuperscript{19} The content is students will learn better if what they have learned has relation with their experience. The learning situation will be meaningfulness if learner feels the experience of what they learned, not just knowing it.

Besides the progressivism philosophy, a cognitive theory also forms the background of contextual teaching and learning. Students will learn better if they involved actively in class and found its content by themselves.

Based on two things above, the constructivism philosophy has been expanding. By constructivism philosophy, contextual teaching and learning is ‘promoted’ as a new alternative strategy in learning process. By contextual teaching and learning, students are hoped to learn by ‘experience’ not ‘memorize’. It is concerned with Zahorik: “…Knowledge is constructed by humans. Knowledge is not a set of facts, concepts, or laws waiting to be discovered. It is not something that exists independent of knower. Humans create construct knowledge as they attempt to bring meaning to their experience.”\textsuperscript{20}

By contextual teaching and learning students connect the subject to their context in real life situations. Making these connections, students see meaning in schoolwork. When students formulate projects or identify

\textsuperscript{19} Nurhadi, et.al., \textit{Pembelajaran Kontekstual dan Penerapannya dalam KBK}, (Universitas Negeri Malang, 2004), 2\textsuperscript{nd} ed. P. 8.

\textsuperscript{20} J. A. Zahorik, \textit{Constructivist Teaching}, (Bloomington: Indiana, Phi Delta Kappa Educational Foundation, 1995).
interesting problems, when they make choices and accept responsibility, search out information and reach conclusion, when they actively choose, order, organize, touch, plan, investigate, questions, and make decisions to reach objectives, they connect academic content to the context of life’s situations, and through those way the students will discover meaning. “The discovery of meaning is the central characteristic of CTL.”\(^2\) The result of learning process is faced to be meaningful for learners. The learning process goes on naturally in the term of students’ activities; working and experiencing; not transferring knowledge from teachers to students. The learning strategy is more important and crucial than the result.\(^2\)

2. The Definition Of Contextual Teaching And Learning

According to Elaine B. Johnson in his book *Contextual Teaching and Learning: What is it and why is it here?* said that: “The CTL system is an educational process that aims to help students see meaning in the academic material they are studying by connecting academic subjects with the context of their daily lives, that is, with the context of their personal, social, and cultural circumstances.”\(^2\) In this understanding, by using CTL system, a teacher should be able to help his or her students connect the subject materials with the context of their daily lives. It means the subject materials should go along with daily needs.

On the other hand, The Washington State Consortium for Contextual Teaching and Learning gives the definition: “Contextual teaching is teaching that enables students to reinforce, expand, and apply their academic knowledge and skills in a variety of in school and out-of-school settings in order to solve simulated or real world problems.”\(^2\) From this definition we can see that CTL asks a teacher to use their knowledge and skills whether in-
school or out-school settings. Besides, a teacher should be able to stimulate his or her lessons based on the real world situations. So, students can apply and experience what is being taught in the real conditions.

The definition above goes along with TEACHNET (Center on Education and Work at the University of Wisconsin-Madison) which says an important definition about CTL as follows:” contextual teaching and learning is a conception of teaching and learning that helps teachers relate subject matter content to real world situations and motivates students to make connection between knowledge and its applications to their lives as family members, citizens, and workers, and engage in the hard work that learning requires” 25. Based on this definition, CTL can help the teacher relate his/her subject to real world situation. On the other hand, CTL also can motivate students to make connections between the material that is being learned and their prior knowledge.

From these definitions above, we know that contextual teaching and learning is a learning strategy that makes students construct the material or the lesson into their own real life situations and apply the knowledge and skills both in-school or out-of-school in order to be able solve problems in their circumstances. By this strategy, students are motivated to make relationship between knowledge and its application in real life situations as a member of family or citizens.

3. The Characteristics of Contextual Teaching and Learning

According to Elaine B. Johnson, there are 8 (eight) main components in CTL they are:

a. Making meaningful connections

Students can manage their selves as the person who learns actively in developing their ideas individually, the person who can work individually or in a group, and the person who does learning by doing.

b. Doing significant work

---

25 TEACHNET, dalam Pembelajaran Kontekstual..., oleh Nurhadi dkk, p. 12.
Students make connections between school and context that go on with the real life; it is as the business does and as the community member.

c. Self-regulated learning
Students make significant works. In this case, there is a reached goal, activity, making a choice and real result.

d. Collaborating
Students can work together. Teacher help students to work effectively in group understand how they can influence each other.

e. Critical and creative thinking
Students can use critically and creatively high level thinking to solve problems and make a decision.

f. Nurturing the individual
Students nurture their personalities, know, give attention, have high hope, motivate and build up themselves. Students cannot success without adult people.

g. Reaching high standards
Students know and reach high standard, identify goal and motivate themselves to reach it. Teacher show to students how to reach which is called “excellence”.

h. Using authentic assessment
Students use academic knowledge in a real world context for a meaningful goal.²⁶

On the other hand, the northwest regional education USA identifies that there are 6 main keys in contextual learning. They are as follows:

a. Meaningful learning: understanding, relevance, and personal assessment are correlated to students’ need in learning the subject content. The learning is more correlated to the real world or students get the point from the lessons, if they have interest to learn for their next future lives. This principle goes along with the meaningful learning proposed by Ausuble.

b. Knowledge application. It is students’ ability to understand what they learn and apply in present or future life.

b. High-level thinking. Students should be taken advantage of thinking critically and creatively in collecting data, understanding an issue and solving the problems.

c. Standard based-curriculum. The content of learning should be correlated with the local standard, state, national and work place need.

d. Cross culture understanding. Teacher should understand and respect the value, belief, students’ habit, friends, educators, and community where he/she teaches.

e. Authentic assessment, the use of any kinds of assessment will reflect the real learning outcome.²⁷

The National Education Department (DepDikNas) in socializing KTSP, that there are 7 (seven) components in CTL. They are:²⁸

a. Constructivism  
✓ Develop their own understanding from new experiences based on their first knowledge.  
✓ Learning must be set up to be a process of ‘constructivists’ not accepting knowledge.

b. Inquiry  
✓ The process of removal from observation to understanding.  
✓ Students learn using critical thinking skills.

c. Questioning  
✓ Teacher’s activity is to encourage, guide, and evaluate the competency of student’s thinking.

d. Learning Community  
✓ A group of student who attach together in learning activities.  
✓ Cooperate with other people is better than individual learning.  
✓ Share experiences with others.  
✓ Share ideas.

e. Modeling  
✓ Showing process an example in order to another people or student think, work, and learn.  
✓ Doing what the teacher want in order the students do it.

f. Reflection  
✓ How to think about what we have learned.  
✓ Make notes what we have learned  
✓ Make a journal, artwork, and group discussion.

g. Authentic Assessment

²⁷ *The Northwest Regional Education Laboratory in Pembelajaran Kontekstual*, By Nurhadi, dkk. P. 14.

²⁸ Pembelajaran Berbasis Kontekstual, www.depdiknas.co.id.
To measure students’ knowledge and creativity.
Product evaluation.
Contextual and relevant tasks.

The writer analyzed that, from three sources above, she finds that each person uses different terms but they have the same meaning and some are different. These are the terms that have same meaning:
1. Making meaningful connection and meaningful learning
2. Authentic assessment
3. Critical and creative learning, High level thinking, Reaching high standard and inquiry
4. Learning community and Collaborating
5. Doing significant work and constructivism

Here are the terms which have different meaning:
1. Self regulated learning
2. Nurturing the individual
3. Knowledge application
4. Standard based-curriculum
5. Cross-culture understanding
6. Questioning
7. Modeling
8. Reflection

4. The Approaches in Contextual Teaching and Learning

According to Nurhadi, there are seven approaches in using contextual teaching and learning (CTL) they are: Problem-Based Learning, Authentic Learning, Inquiry-Based Learning, Project-Based Learning, Work-Based Learning, Service Learning, and Cooperative Learning29.

a. Problem Based Learning

29Nurhadi, et.al., Pembelajaran ..., P. 19.
The definition of Problem Based Learning (PBL) is “a term used within education for a range of pedagogic approaches that encourage students to learn through the structured exploration of a research problem.”\textsuperscript{30} “Problem Based Learning is focused; experiential learning (minds on-hands on) organized around the investigation and resolution of messy, real-world problems.”\textsuperscript{31} Thus, Students are engaged problem solvers, identifying the root problem and the condition needed for a good solution, pursuing meaning and understanding, and becoming self-directed learners. Students both define the problem and gather information to explore it. The role of teachers are problem-solving colleagues who model interest and enthusiasm for learning and also cognitive coaches who nurture an environment that support open inquiry.

b. Authentic Learning

In order to make student learning relevant to real life experiences, learning environment must be authentic. “Authentic learning is a pedagogical approach that allows students to explore, discuss, and meaningfully construct concept and relationships in context that involve real world problems and projects that are relevant to the learner.”\textsuperscript{32} In addition according to Brown et al., 1989; Lave & Wenger, 1991), “learning is a process of interacting with the outside world, and continually reanalyzing and reinterpreting new information and its relation to the real world.”\textsuperscript{33} Basically, authentic learning offers the opportunity for teachers to bring the outside world into the classroom.

c. Inquiry-Based Learning

“Inquiry-Based Learning (IBL) is a project-oriented strategy based on constructivist and socio-constructivist theories of learning.”\textsuperscript{34} It is often described as a cycle or a spiral, which implies formulation of question,
investigation, creation of a solution or an appropriate response, discussion and reflection in connection with results. Basically, IBL is a student-centered and student-lead process. The purpose is to engage the student in active learning, ideally based on their own questions.

d. Project-Based Learning

Project-Based Learning is allowed the students to work independently in constructing their learning, and culminating into the real situation.

e. Work-Based Learning

“Work-Based Learning (WBL) is career awareness and exploration, work experience, structured training, and/or mentoring at the work site.” Work-based learning provides students with opportunities to study complex subject matter as well as vital workplace skills in a hands-on and real life environment.

f. Service Learning

Service Learning is a teaching and learning methodology which fosters civic responsibility and applies classroom learning through meaningful service to the community. In service learning programs, students and teachers use the experience of service as one of information and ideas, along with the classroom, laboratory, library and internet. They are asked to analyze critically what they learn from the service, just they analyze the information and garnered from the sources of traditional academic study. Service learning can improve academic and social outcomes for students by providing them with opportunities to apply academic knowledge to real world issues.

g. Cooperative Learning

Cooperative learning maximizes the use of small group in teaching learning process.

35 http://www.exploratorium.edu/IFI/resources/classroom/inquiry_based.html
36 http://www.exploratorium.edu/IFI/resources/classroom/inquiry_based.html
5. Principles in Applying Contextual Teaching and Learning

According to Nurhadi, there are seven approaches in applying contextual teaching and learning (CTL). Teachers should consider using these principles in their classroom. They are: Learning strategy should be based on students’ mental development, Building up the interdependent learning groups, Providing an atmosphere that supports a self regulated learning, Considering the diversity of students, Focusing on multiple intelligences, Using the questioning techniques for improving students’ learning, and Applying an authentic assessment.37

a. Learning strategy should be based on students’ mental development

The correlation between the core of curriculum and methodology that is used; it should be based on students’ social condition, emotional and intellectual development. According to Kilmer, what is junior high school student learn; it would be different from senior high school students.

b. Building up the interdependent learning groups

Students can learn something from his or her group, and also can cooperate with a larger group, that is called class. This skill is a kind of cooperative that is needed by students in workplaces or other contexts.

c. Providing an atmosphere that supports a self regulated learning

Students need an understanding with their strengths and weaknesses for tidying up the goals that they want to reach and building strategies for reaching those goals. Meanwhile, teachers must also create and provide an atmosphere where students can reflect how they think,

37 Nurhadi, et.al., Pembelajaran ..., P. 20.
finish school’s project, solve problem and work together with teacher harmonically.

d. Considering the diversity of students

In classroom, teachers should teach students about all kinds of diversities, example: cultural background, social rank, daily spoken language. So that, it is hoped that teachers can help students to reach their learning goals.

e. Focusing on multiple intelligences

In using CTL, the way of students in participating in the classroom should be focused on 8 learning orientations. They are; special-verbal, intrapersonal, musical-rhythmic, naturalist, body-kinesthetic, interpersonal, and logic mat. That is why, in teaching students, teacher should combine all strategies and it will be effective for students.

f. Using the questioning techniques for improving students’ learning

Questions should be planned carefully for getting level, response, and action needed by students in the process of contextual learning.

g. Applying an authentic assessment

Authentic assessment is designed to be criterion-referenced rather than norm-referenced. Such evaluation identifies strengths and weaknesses, but does not compare or rank students. It is often based on performance; students are asked to demonstrate their knowledge, skills, or competencies in whatever way they find appropriate. There are several challenges to using authentic assessment methods. They include managing its time-intensive nature, ensuring curricular validity, and minimizing evaluator bias.

F. Teaching Present Perfect Tense Using CTL

Before the writer teaches, she prepares the suitable material. Preparing suitable material has to do by the teacher in order the teaching learning process run well successfully. Here, the writer prepares the materials related to contextual teaching and learning method. When teacher apply CTL in the classroom, it must
include 7 main components of CTL. They are constructivism, inquiry, questioning, learning community, modeling, reflection, and authentic assessment.

For supporting 7 main components of CTL, the teacher needs some teaching aids/teaching material. Here they are:

- 8 markers
- 8 cartoon paper
- 10 pictures to show up an activity
- 8 handouts consist of dialogues and short stories that contain 4 kinds tenses. They are; simple present tense, simple past, present continuous, and present perfect tense.
- Pen, block note, pin for present

Here are the steps for teaching present perfect tense by using contextual teaching and learning. These steps are taken from Nurhadi’s book which title ‘Pembelajaran kontekstual dan penerapannya dalam KBK’ with the adjustment of teaching present perfect tense

1. Preliminary Activities

   a. Class divided into 8 groups. Each group is given 1 cartoon paper and 1 marker.
   b. Teacher distributes the handout for each group. The handout is about stories in simple present tense, simple past, present continuous tense, and present perfect tense.
   c. Teacher asks to each group to identify the kind of tenses. After identify, each group should write their conclusion on cartoon paper. They should draw time lines, definition of tenses, and adverb of time with their own creation.
   d. One of student from each group has to perform their conclusion in front of the class. Each group only has 3 minutes to perform their conclusion.
   e. Teacher gives a present (like; pen, block note and pin) for the best performance. Its aim to appreciate students’ performance.

---

38Nurhadi, et.al., Pembelajaran ..., P. 54.
2. Presentation
   a. Teacher tells to students that they are going to learn present perfect tense.
   b. Teacher shows up some pictures and ask the “what has happened in the picture?”
   c. Teacher asks to the students to write as many sentences as they can about themselves and their life by using present perfect tense. Ex: *I have lived in Ciputat from 1996 to 2000. I have eaten noodle for breakfast.*
   d. Teacher asks to the students to read their sentences one by one randomly. After that, teacher collects student’ assignment.
   e. Teacher gives the explanation shortly about present perfect tense.
   f. Teacher asks to the students what they have learned today.

3. Closing
   After teaching process, teacher asks to the students what they have learned today. After that, teacher and students make summarize about present perfect tense.
CHAPTER III
RESEARCH METHODOLOGY

This chapter discusses and presents about research design, place and time of the study, population and sample, technique of data collecting, and technique of data analysis.

A. Research Design

This study is categorized as quantitative descriptive analyses. It is called quantitative descriptive analyses research because this study tries to analyze and describe about the application of contextual teaching and learning and its effectiveness in teaching present perfect tense at the first grade of SMK Grafika Yayasan Lektur Lebak Bulus Jakarta Selatan.

This study is aimed to compare the learning achievement about present perfect tense before taught by using contextual teaching and learning and after taught by using contextual teaching and learning.

B. Place and Time of the Study

1. Place of the Research
   a. Location and Address
   SMK Grafika Yayasan Lektur is at Jalan Pasar Jum’at. It is located in Lebak Bulus, South Jakarta; it is next to Lebak Bulus Bus Station.
   b. History Background
   In December 21, 1954 Grafika Training Center was opened by the minister of Education and Culture, Prof. Moh. Yamin; and was authorized by vice president of Indonesia; Drs. Mohammad Hatta.
   This school was named Grafika Training Center (Pusat Latihan Grafika) because it must be different schools whether in the curriculum and the system of education. It was aimed to train vocational students in graphic fields. So, after finishing the training, they would become skillful
graduates in graphics. And then, they would work in government or private offices, publishing company, book store, etc.

In 1954 until 1964 Grafika Training Center has just received students graduated from Elementary School. But, since January 6, 1968; Grafika Training Center had become a vocational high school for technician (STM) that received students graduated from Junior High School only. It was based on the reality that the graduates were too young to work and they still needed the mature mentally. From 1968 until now, Grafika training center has just received students who graduated from Junior High School only.

c. The Classrooms and the Departments

SMK Grafika has 12 classrooms. There are 4 classrooms for grade X, 4 classrooms for grade XI, and 4 classrooms for grade XII. From grade X to XII, there are 539 students in number. Besides, SMK Grafika has 2 departments. They are Graphic Preparation and Graphic Production.

d. The Graduates and Teachers

For the long period (1957-2008); SMK Grafika has already graduated about 4246 students who have worked in Indonesian’s publishing companies.

And for the teachers; SMK Grafika has 39 teachers. Most of them are private teachers and others are civil servants. SMK Grafika also has 19 employees.

2. Time of the research

The writer conducts the research from April, 29 2009 up to May, 26 2009.

C. Population and Sample

The writer did the research to the first grade students of SMK Grafika. The first grade of the students is 190 students which divided into 4 classes. She took only 40 students in number as the sample of the research from each class 10 students by using random sampling.
D. Technique of Data Collecting

To get the data that is related to her writing, the writer has used test and documentation:

a. Test

The test was done for getting the data objectives of students’ achievement in teaching present perfect tense by using contextual teaching and learning. There were 2 tests given to the students by the writer. The first was pre-test before teaching learning process and the second was post-test after teaching learning process.

The test was multiple choice forms. This test consists of 25 items. Each item has 4 point if the students get correct answer. So, 25 multiply by 4 is 100 point.

According to Drs. S. Margono in his book *Metodologi Penelitian Pendidikan*, he said that:

"Untuk mengukur validitas pada pembuatan tes/soal maka penyebaran soal harus 20% soal sukai, 50% soal sedang dan 30% soal mudah".

"To measure of validity in distribution of test, the distribution of test must be 20% difficult test, 50% medium test and 30% easy test” 39

Because the tests are 25 so:

\[ 20 \times 25 = 5 \] (5 number is difficult test)

\[ 50 \times 25 = 12.5 \] (The writer make decided as many as 12 number as medium test)

\[ 30 \times 25 = 7.5 \] (The writer make decided as many as 8 number as easy test)

---

**b. Documentation**

The writer has been documented about the history of school, number of student, number of the teacher and employee, number of graduated students, students’ score, etc.

**F. Technique of Data Analysis**

The technique of data analysis used in this research is T-test formula. The writer has to seek the significance differences result between pre-test and post-test by using formula as followed:

---

\[ t_o = \frac{M_1 - M_2}{SE_{M_1 - M_2}} \]

Note:

\( t_o \): t observation/the value by which the statistical significance of the mean difference will be judged

\( M_1 \): Mean variable of post-test’s score

\( M_2 \): Mean variable of pre-test’s score

\( SE_{M_1 - M_2} \): Standard Error of mean 1 and mean 2

The steps are:

a. Seek mean of variable I (X variable/post-test’s score):

\[ M_1 = \frac{\sum FX}{N} \]

Note:

\( M_1 \): Mean variable of post-test’s score

\( \sum FX \): The result calculation from frequency multiplied by X variable score

\( N \): Number of cases

b. Seek mean of variable II (Y variable/pre-test’s score):

\[ M_2 = \frac{\sum FY}{N} \]

Note:

\( M_2 \): Mean variable of pre-test’s score

\( \sum FY \): The result calculation from frequency multiplied by Y variable score

\( N \): Number of cases
c. Seek the standard of deviation from variable I (X variable):

\[ SD_1 = \sqrt{\frac{\sum FX^2}{N} - \left(\frac{\sum FX}{N}\right)^2} \]

Note:
- \( SD_1 \): Standard Deviation of post-test’s score
- \( \sum FX^2 \): The result multiplication from: X variable multiplied by X variable and multiplied by frequency
- \( \sum FX \): The result calculation from frequency multiplied by X variable score
- \( N \): Number of cases

d. Seek the standard of deviation from variable II (Y variable):

\[ SD_2 = \sqrt{\frac{\sum FY^2}{N} - \left(\frac{\sum FY}{N}\right)^2} \]

Note:
- \( SD_2 \): Standard Deviation of pre-test’s score
- \( \sum FY^2 \): The result multiplication from: Y variable multiplied by Y variable and multiplied by frequency
- \( \sum FY \): The result calculation from frequency multiplied by Y variable score
- \( N \): Number of cases

e. Seek the standard error of mean from variable I (X variable):

\[ SE_{M_1} = \frac{SD_1}{\sqrt{N - 1}} \]

\( SE_{M_1} \): Standard Error of mean 1
\( SD_1 \): Standard Deviation of post-test’s score
\( N \): Number of cases
f. Seek the standard error of mean from variable II (Y variable):

\[
SE_{M_2} = \frac{SD_2}{\sqrt{N - 1}}
\]

\(SE_{M_2}\) : Standard Error of mean 2

\(SD_2\) : Standard Deviation of post-test’s score

\(N\) : Number of cases

g. Seek coefficient of correlation ‘r’ product moment (\(r_y\) or \(r_{12}\)) which shows strength and weaknesses of correlation between variable I (X variable) and variable II (variable Y) by using scatter diagram:

\[
\frac{\sum x'y' - (C_x')(C_y')}{N \left( SD_x' \right) \left( SD_y' \right)}
\]

Note:

\(r_y / r_{12}\) : The value of index correlation number between X variable and Y variable

\(\sum x'y'\) : The value of the result calculation between frequency and \(x'y'\)

\(C_x'\) : Correction number X variable

\(C_y'\) : Correction number Y variable

h. Seek the standard error of differences between mean of variable I and mean variable II, by using formula:

\[
SE_{M_1-M_2} = \sqrt{SE_{M_1}^2 + SE_{M_2}^2 - (2.r_{12})(SE_{M_1})(SE_{M_2})}
\]

Note:

\(SE_{M_1-M_2}\) : Standard Error of mean 1 and mean 2

\(SE_{M_1}\) : Standard Error of mean 1

\(SE_{M_2}\) : Standard Error of mean 2
i. Seek to with formula:

\[ t_0 = \frac{M_1 - M_2}{SE_{M_1 - M_2}} \]
CHAPTER IV
RESEARCH FINDING

This chapter presents description of data, Analyses of Data, test of hypothesis, and interpretation of data.

A. Description of Data

To know the result of the test, the writer makes the table of students’ score before using CTL and after uses it in teaching present perfect tense as follows:

Table 4.1
The result of pre-test and post-test

<table>
<thead>
<tr>
<th>Students</th>
<th>The result of test</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Before teaching by using CTL</td>
</tr>
<tr>
<td>1</td>
<td>32</td>
</tr>
<tr>
<td>2</td>
<td>40</td>
</tr>
<tr>
<td>3</td>
<td>44</td>
</tr>
<tr>
<td>4</td>
<td>28</td>
</tr>
<tr>
<td>5</td>
<td>32</td>
</tr>
<tr>
<td>6</td>
<td>48</td>
</tr>
<tr>
<td>7</td>
<td>52</td>
</tr>
<tr>
<td>8</td>
<td>32</td>
</tr>
<tr>
<td>9</td>
<td>44</td>
</tr>
<tr>
<td>10</td>
<td>40</td>
</tr>
<tr>
<td>11</td>
<td>24</td>
</tr>
<tr>
<td>12</td>
<td>48</td>
</tr>
<tr>
<td>13</td>
<td>56</td>
</tr>
<tr>
<td>14</td>
<td>44</td>
</tr>
<tr>
<td>15</td>
<td>40</td>
</tr>
<tr>
<td>16</td>
<td>36</td>
</tr>
</tbody>
</table>
From this table, the writer gained:

1. Score variable Y (before teaching by using CTL):
   a. The lowest score is 24
   b. The highest score is 56
   c. The average/Mean of variable Y is 40.4
2. Score variable X (after teaching by using CTL):
   a. The lowest score is 44
   b. The highest score is 76
   c. The average/mean of variable X is 61.6

B. Analyses of Data

After the writer gave description of data, the writer did the analyses of data. Here are the analyses of data:

Table 4.2
The result calculation of variable X (post-test)

<table>
<thead>
<tr>
<th>X</th>
<th>F</th>
<th>FX</th>
<th>FX^2</th>
</tr>
</thead>
<tbody>
<tr>
<td>76</td>
<td>2</td>
<td>152</td>
<td>11552</td>
</tr>
<tr>
<td>72</td>
<td>7</td>
<td>504</td>
<td>36288</td>
</tr>
<tr>
<td>68</td>
<td>6</td>
<td>408</td>
<td>27744</td>
</tr>
<tr>
<td>64</td>
<td>4</td>
<td>256</td>
<td>16384</td>
</tr>
<tr>
<td>60</td>
<td>8</td>
<td>480</td>
<td>28800</td>
</tr>
<tr>
<td>56</td>
<td>3</td>
<td>168</td>
<td>9408</td>
</tr>
<tr>
<td>52</td>
<td>5</td>
<td>260</td>
<td>13520</td>
</tr>
<tr>
<td>48</td>
<td>4</td>
<td>192</td>
<td>9216</td>
</tr>
<tr>
<td>44</td>
<td>1</td>
<td>44</td>
<td>1936</td>
</tr>
</tbody>
</table>

40 = N 2464 = \sum FX 154848 = \sum FX^2

Seek mean variable I, standard deviation variable I, and standard error variable I:

\[ M_1 = \frac{\sum FX}{N} = \frac{2464}{40} = 61.6 \]

\[ SD_1 = \sqrt{\frac{\sum FX^2}{N} - \left(\frac{\sum FX}{N}\right)^2} \]
\[
\sqrt{\frac{154848}{40} - (61.6)}\]

\[= \sqrt{3871.2 - 3794.6} = \sqrt{76.64} = 8.754\]

\[
SE_m = \frac{SD_1}{\sqrt{N-1}} = \frac{8.754}{\sqrt{39}} = \frac{8.754}{6.245} = 1.402
\]

**Table 4.3**
The result calculation of variable Y (pre-test)

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Y</td>
<td>F</td>
<td>FY</td>
<td>FY²</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>56</td>
<td>2</td>
<td>112</td>
<td>6272</td>
</tr>
<tr>
<td>52</td>
<td>3</td>
<td>156</td>
<td>8112</td>
</tr>
<tr>
<td>48</td>
<td>7</td>
<td>336</td>
<td>16128</td>
</tr>
<tr>
<td>44</td>
<td>5</td>
<td>220</td>
<td>9680</td>
</tr>
<tr>
<td>40</td>
<td>9</td>
<td>360</td>
<td>14400</td>
</tr>
<tr>
<td>36</td>
<td>3</td>
<td>108</td>
<td>3888</td>
</tr>
<tr>
<td>32</td>
<td>6</td>
<td>192</td>
<td>6144</td>
</tr>
<tr>
<td>28</td>
<td>3</td>
<td>84</td>
<td>2352</td>
</tr>
<tr>
<td>24</td>
<td>2</td>
<td>48</td>
<td>1152</td>
</tr>
<tr>
<td>40 = N</td>
<td>1616 = (\sum FY)</td>
<td>68128 = (\sum FY^2)</td>
<td></td>
</tr>
</tbody>
</table>

Seek mean variable II, standard deviation variable II, and standard error variable II:

\[
M_2 = \frac{\sum FY}{N} = \frac{1616}{40} = 40.4
\]

\[
SD_2 = \sqrt{\frac{\sum FY^2}{N} - \left(\frac{\sum FY}{N}\right)^2}
\]
\[ Z = \frac{68128}{40} - (40.4) \]
\[ = \sqrt{1703.2 - 1632.16} \]
\[ = \sqrt{71.04} = 8.428 \]

\[ SE_{M_z} = \frac{SD_z}{\sqrt{N - 1}} = \frac{8.428}{\sqrt{39}} = \frac{8.428}{6.245} = 1.349 \]

Seek coefficient of correlation ‘r’ product moment \( (r_{xy} \text{ or } r_{xy}) \) which shows strength and weaknesses of correlation between variable I (variable X) and variable II (variable Y). Because of the number of cases (N) is many, so, to seek coefficient of correlation ‘r’ product moment is doing by using scatter diagram:

**Table 4.4**

**Scatter Diagram**

Variable X score (after teaching by CTL)

<table>
<thead>
<tr>
<th>X</th>
<th>Y</th>
<th>fy</th>
<th>y'</th>
<th>fy'</th>
<th>fy'^2</th>
<th>( \sum xy' )</th>
</tr>
</thead>

<td>1</td>
<td>16</td>
<td>51</td>
</tr>
<tr>
<td>3</td>
<td>4</td>
<td>3</td>
<td>5</td>
<td>0</td>
<td>2</td>
<td>16</td>
</tr>
</tbody>
</table>

\[ \sum fy' = 4 \]
\[ \sum fy'^2 = 178 \]
\[ \sum xy' = 180 \]

Checking
From this scatter diagram the writer gets:

\[ \sum f_x' = 16, \quad \sum f_x'^2 = 198, \quad \sum x'y' = 180 \]
\[ \sum f_y' = 4, \quad \sum f_y'^2 = 178, \quad N = 40 \]

\[ C_x = \frac{\sum f_x'}{N} = \frac{16}{40} = 0.4 \]
\[ C_y = \frac{\sum f_y'}{N} = \frac{4}{40} = 0.1 \]

\[ SD_x = \sqrt{\frac{\sum f_x'^2 - (C_x')^2}{N}} = \sqrt{\frac{198}{40} - (0.4)^2} = \sqrt{4.95 - 0.16} = \sqrt{4.79} = 2.188 \]
\[ SD_y = \sqrt{\frac{\sum f_y'^2 - (C_y')^2}{N}} = \sqrt{\frac{178}{40} - (0.1)^2} = \sqrt{4.45 - 0.01} = \sqrt{4.44} = 2.107 \]

By getting \( C_x', \ C_y', \ SD_x, \) and \( SD_y, \) the writer can seek \( r_{xy} \) by using formula:

\[ r_{xy} = r_{12} = \frac{\sum x'y' - (C_x')(C_y')}{(SD_x)(SD_y)} \]
\[ = \frac{180 - (0.4)(0.1)}{\sqrt{2.188}(2.107)} \]
\[ = \frac{4.5 - 0.04}{4.61} \]
\[ = \frac{4.46}{4.61} = 0.967 \]

By getting \( r_{xy} \) or \( r_{12} \) as bigger as 0.967 next the writer can seek the differences of standard error from variable I and variable II or \( SE_{M_1-M_2} \):

\[ SE_{M_1-M_2} = \sqrt{SE_{M_1}^2 + SE_{M_2}^2 - (2.r_{12})(SE_{M_1})(SE_{M_2})} \]
\[ = \sqrt{(1.402)^2 + (1.349)^2 - (2.0.967)(1.402)(1.349)} \]
\[ = \sqrt{1.966 + 1.819 - (1.934)(1.891)} \]
\[ = \sqrt{3.785 - 3.657} = \sqrt{0.128} = 0.358 \]

Seek \( t \) by using formula:
\[ t = \frac{M_1 - M_2}{SE_{M_1-M_2}} = \frac{61.6 - 40.4}{0.358} = \frac{21.2}{0.358} = 59.217 \]

C. Test of Hypothesis

In chapter two the writer has written the hypothesis; they are \( H_0 \): There is no a significance learning achievement between after and before students taught present perfect tense by using CTL. And \( Ha \): There is a significance learning achievement between after and before students taught present perfect tense by using CTL. Based on the result of calculation \( t \) is 59.217, the writer determining t-table in significance level 5% and 1% with \( df \): \( df = n - 1 = 40 - 1 = 39 \) (“t” Score Table Consultation). In the fact, we cannot find \( df \) as many as 39; because of that, we use the closest \( df \). It is 40. With \( df \) 40 the writer gained the t-table:
Significance level 5%: \( t \) = 2.02
Significance level 1%: \( t \) = 2.71
So, \( t \) is much bigger than \( t \); they are:
\[ 2.02 < 59.217 > 2.71 \]

If \( t \) is bigger than \( t \), \( Ha \) is accepted and \( H_0 \) is rejected.

D. Interpretation of Data

From this result, the alternative hypothesis is accepted and null hypothesis is rejected. If the \( Ha \) is accepted and \( H_0 \) is rejected, it means that contextual teaching and learning is effective as a method in teaching present perfect tense. It means that between two variables (variable X and variable Y) there is a significant learning achievement. The writer can interpret that by using contextual teaching and learning as a method in teaching present perfect tense is surely effective.
CHAPTER V
CONCLUSION AND SUGGESTION

In this chapter the writer conclude the result of the study based on analyses of data, test of hypothesis, and interpretation of data which was done in chapter four. It is consist of conclusion and suggestions.

A. Conclusion

After analyzing the finding research, which has been done in chapter IV, the writer can conclude that: there is a significant difference between present perfect scores both before and after the teaching by using contextual teaching and learning. It means that CTL method has shown its effectiveness significantly as the teaching method for present perfect tense.

B. Suggestion

Because the research result has shown that there is a significant learning achievement between before and after the teaching of present perfect tense to the student by using CTL; it is suggested that:

1. The teacher would be better if use the Contextual Teaching and Learning as a method in their teaching learning process, especially in teaching grammar. So, students can improve their understanding about grammar.
2. The teacher should improve their knowledge in understanding the concept of contextual teaching and learning.
3. The teacher must be creative in creating activities’ classroom. They should focus on learning strategies not information transfer.
4. The teacher should focus on students’ intelligence, students’ emotion, and students’ learning style.
5. The teacher have to motivate students to be more relaxed in learning English and tell them that English is useful in their life.
6. The teacher can use many sources of English text book that is related to
the teaching English Grammar, especially about present perfect tense.
7. Students should apply the knowledge and skills both in-school or out-of-
school in order to be able solve problems in their circumstances.
8. Students should always study hard for improving their knowledge and skill
through mass and electronic media. In addition, they should improve their
understanding and use them in daily lives.
9. For the further research; it can be done with other variables whether
grammar aspect (linguistic competence) or other linguistic aspects.

Standar Kompetensi : Berkomunikasi lisan tertulis dan lisan menggunakan ragam bahasa yang sesuai dengan lancar dan akurat dalam wacana interaktional dan/atau monolog terutama berkenaan dengan wacana bentuk naratif, prosedur, spoof/recount, report dan news item. (Tema disesuaikan dengan jenis teks yang sedang dibahas dan tingkat kemampuan linguistic siswa).

Indikator : Mengidentifikasi kalimat-kalimat sederhana dalam bentuk present perfect.

I. Tujuan Pembelajaran : - siswa dapat menjelaskan bentuk kalimat present perfect tense.
- Siswa dapat membuat kalimat-kalimat dalam present perfect tense

II. Materi Ajar : Grammar: Present Perfect Tense

III. Metode Pengajaran : Contextual Teaching Learning

IV. Langkah – Langkah Pembelajaran:

A. Kegiatan Awal:
- Doa
- Absensi
- Motivasi dengan mengarahkan siswa pada situasi pembelajaran

B. Kegiatan Inti:
- Guru membagi siswa ke dalam 8 grup, masing-masing kelompok
  Mendapatkan 1 kertas karton dan I marker.
- Guru membagikan kertas yang berisi dialog atau cerita pendek dalam bentuk simple present, simple past, present continuous, dan present perfect tense.
- Guru meminta siswa untuk mengidentifikasi bentuk-bentuk kalimat yang ada dikertas tersebut; setiap grup harus menuliskan bentuk kalimat, pengertian dan keterangan waktu.
- Guru meminta satu siswa dari masing-masing grup mempresentasikan di depan kelas.
- Guru menjelaskan ke siswa bahwa mereka akan belajar present perfect tense.
- Guru menggambar keterangan waktu present perfect tense, contoh dalam konteks kalimat dan keterangan waktu.
- Guru memberikan formula (rumus) untuk masing-masing kalimat yang menggunakan present perfect tense.
• Guru meminta siswa untuk menulis sebanyak mungkin kalimat yang menggunakan present perfect tense.
• Guru secara acak memilih dan meminta siswa membaca kalimat yang sudah ditulis.

C. Kegiatan Akhir:
• Guru merangkum materi bersama siswa.
• Guru memberikan test penguasan secara tertulis dan lisan
• Guru dan siswa melakukan refleksi
• Guru menutup kelas.

V. Sumber Belajar: Basic Grammar, EzineArticles.com, dan English Grammar in Use.

Soal-Soal Present Perfect Tense

Forming the Present Perfect

1. My car ________ down.
   - have broke
   - have broken
   - has broke
   - has broken

2. We ________ across the Pacific.
   - have sailed
   - have sail
   - has sailed
   - has sail

3. She ________ three pieces of pizza already.
   - have ate
   - have eaten
   - has ate
4. I ________ five miles to get here.

- have rode
- have ridden
- has rode
- has ridden

5. The books ________ on that shelf for fifteen years.

- have be
- have been
- has be
- has been

6. They ________ a brand new sports car.

- have just bought
- have just buy
- has just bought
- has just buy
7 She ________ hard this semester.

- have worked
- have work
- has worked
- has work

8 I ________ snowboarding.

- have never try
- have never tried
- has never try
- has never tried

9 ________ an eagle?

- Have you ever seen
- Have you ever see
- Has you ever seen
- Has you ever see

10 Someone ________ my video player!

- have stole
Using the Present Perfect: Present Perfect or Simple Past?

1 Dolphins ________ in BC waters for millions of years, and are still common today.

- have stolen
- has stole
- has stolen
- lived
- have lived

2 I ________ my binder yesterday, but my brother found it this morning.

- lost
3. The Titanic _______ in 1912.
   - sank
   - has sunk

4. We _______ this TV set since 1968, and it still works!
   - owned
   - have owned

5. This wine _______ in the cellar for 15 years. When we take it out and open it, it will taste beautiful!
   - was
   - has been
6. He ________ when his girlfriend left him, but he's OK now.

- cried
- has cried

7. I ________ some new shorts, but I don't think I like them. Maybe I'll take them back to the store.

- bought
- have bought

8. Junko ________ bacon in her life! She's a true vegetarian.

- never ate
- has never eaten

9. I ________ these boots to go hiking yesterday.

- wore
- have worn
10 The children ________ all the orange juice!
   We'll need to get some more.

☐ drank
☐ have drunk

Present Perfect and Simple Past

Click on the correct answer.

1 Joji ________ in Tokyo for five years, but he left in 1993.
   
   ☐ lived
   ☐ have lived

2 The Titanic ________ in 1912.
   
   ☐ sank
   ☐ has sunk

3 Somebody ________ my bicycle! Now I'll have to walk home.
   
   ☐ stole
   ☐ has stolen
4  Gerry ________ off his bike three times this month.
   □ fell
   □ has fallen

5  Chika ________ from university last July.
   □ graduated
   □ has graduated

6  I ________ the movie Titanic three times. I'm going to see it again tonight.
   □ saw
   □ have seen

7  I ________ to work every day for the last six weeks!
   □ walked
   □ have walked

8  When Young Hee was a child, she ________ in Seoul.
   □ lived
   □ has lived

9  Ouch! ________ my finger!
   □ I cut
   □ I've cut
10 I ________ my key yesterday, so I couldn't get into the house. Eventually, I found it in my jacket pocket.

lost

have or has

Fill the gaps with 'have' or 'has'.

1. I ________ answered the question.
2. She ________ opened the window.
3. They ________ called us.
4. You ________ carried a box.
5. It ________ rained a lot.
6. We ________ washed the car.
7. He ________ closed the window.
8. Jenny ________ locked the window.
9. The girls ________ visited the museum.
10. John and Sophie ________ helped in the garden.

Exercise on Present Perfect Simple

Positive Sentences in Present Perfect Simple

Write positive sentences in present perfect simple

The following people have just completed an action.

1. Bob / visit / his grandma
2. Jimmy / play / on the computer
3. Sue and Walter / wash / their car
4. Andrew / repair / his bike
5. Phil / help / Anne with maths
6. Brad and Louise / watch / a film
7. Tamara / talk to / her best friend
8. Bridgette / draw / a picture
9. Carol / read / a computer magazine
10. Tom and Alice / be / to a restaurant

Exercise on Present Perfect Simple

Negative Sentences in Present Perfect Simple

Write negative sentences in present perfect simple.

The weather was wonderful today. So the children were in the park all afternoon and have not done their household chores:

1. Sarah / not / wash the dishes
2. Anita / not / clean the kitchen
3. Maureen and Gavin / not / water the plants
4. Joey / not / make his bed
5. David / not / buy milk
6. Lisa / not / be to the baker's
7. Aran and Jack / not / do their homework
8. Jane and Ben / not / tidy up their rooms
9. Alex / not / feed the hamster
10. Hazel / not / empty the bin

Exercise on Present Perfect Simple

Sentences with 'never' in Present Perfect Simple

Write sentences in present perfect simple. Place 'never' before the main verb.

In a contest, people get the chance to do something they've never done before. This is what the participants told the jury:
2. Rebecca / never / stay / at a five-star hotel
3. Jason / never / watch / a world-cup final
4. Rachel and Gareth / never / climb / Mount Kilimanjaro
5. Elaine / never / see / a whale
6. Ruth / never / spend / her holiday in Mexico
7. Connor / never / be / to Canada
8. Lisa and Holly / never / cycle / around England
9. Barry / never / drive / a Ferrari
10. Clare / never / meet / Mi

Exercise on Present Perfect Simple

Put the verbs into the correct form (present perfect simple).

1. I (not / work) ______ today.
2. We (buy) ______ a new lamp.
3. We (not / plan) ______ our holiday yet.
4. Where (be / you) ______?
5. He (write) ______ five letters.
6. She (not / see) ______ him for a long time.
7. (be / you) ______ at school?
8. School (not / start) ______ yet.
9. (speak / he) ______ to his boss?
10. No, he (have / not) ______ the time yet.

Grammar Exercise on The Text

Loch Ness

Loch Ness is a lake between the Scottish towns of Inverness and Fort Augustus. The word *loch* is Scottish for *lake*. Loch Ness is about 37 km long and extremely deep, the deepest part is 226 m.
Loch Ness is famous for its friendly monster, Nessie. Most people think that this is only a legend, but every year tourists from all over the world come to Loch Ness and hope that they will see the monster.

Write the verbs in present perfect simple.

1. Tourists from all over the world (be) ________ to Loch Ness.
2. Most of them (see / not) ________ Nessie, however.
3. Only very few people say that the Loch Ness Monster (appear) ________ in front of them.
4. Even scientists (come) ________ to Loch Ness to find the monster.
5. And the boss of the Guinness brewery (promise) ________ to pay 500,000 Pounds to the person who catches Nessie.

A Look at the Intriguing History of Snowboarding

By Keith Kingston

To say who actually invented the sport of snowboarding would be impossible because people have always loved to slide down a snow-covered hill. Soaring through the snow on some kind of seat or board is nothing new. The ways to enjoy the snow are numerous, and people have devised ways to turn garbage can lids and cardboard into ‘snow boards’ to enjoy an afternoon frolic outdoors. The various ways to glide through snow have become more sophisticated and have evolved into using polished boards or skis in much the same manner as a surfboarder would ride a wave.

There have been many attempts at developing a modern snowboard. In 1965, the ‘Snurfer’ (a word play on ‘snow’ and ‘surfer’) was developed as a child’s toy. Two skis were bound together and a rope was placed at the front end to afford control and stability. Over 500,000 ‘Snurfers’ were sold in 1966 but they were never seen as more than a child’s plaything even though organized competitions began to take place. The year 1969 brought a slightly more sophisticated snowboard based on the principles of skiing combined with surfboard styling.
The ‘Flying Yellow Banana’ was developed in 1977. This was nothing more than a plastic shell covered with a top surface like that of a skateboard, but at the time it was considered a major advance in the little known sport of snowboarding. The first national snowboard race was held in the area outside Woodstock and was known as ‘The Suicide Six.’ The race consisted of a steep downhill run called The Face in which the main goal was probably mere survival.

Snowboarding continued to increase in popularity over the next several years. In 1985 the first magazine dedicated specifically to snowboarding hit the news stands with huge success and furthered the popularity of this exciting sport. Hordes of fans began to organize regional events and pretty soon snowboarding events were held in all parts of the world. In the year 1994 snowboarding was finally declared an Olympic event, much to the delight of fans. The not-so-new sport of snowboarding was finally recognized and meant a huge victory for serious snowboarders across the globe.

A collection of snowboarding tricks and stunts was released on video in 1996. Filmed in Alaska, the breathtaking beauty and captivating snowboarding techniques featured in the video exposed snowboarding to a new generation, and by 1998 snowboarding constituted almost 50% of all winter activity. Today, nearly all ski resorts accept snowboarders. There are still a few holding on to the past but this is unlikely to continue as the number of snowboarders continually increases.

From the first crudely built snowboards to the advanced and specialized models available today, snowboarders have carried a ‘bad boy’ image. This rebel reputation is still common today in spite of the fact that snowboarding appeals to men, women, and children of all nationalities and social groups. At most major ski resorts you can find snowboarding gear, information, and lessons. Olympic and world wide snowboarding events are among the most popular of winter sports and the competition to be the best is fierce.

Retailers nation wide and around the world carry many types of snowboards, and the choice in specially made snowboarding gear is immense. Snowboarders have participated in the X Games and even charity events such as Boarding for Breast
Cancer. From its early meager beginnings snowboarding has progressed into a fully recognized sport, and large numbers of people are turning to snowboarding for adventure, fun, and professional recognition.

## Forming the present perfect tense

This tense is formed using two components: the verb HAVE (in the present tense), and the past participle form of a verb. With a regular verb the past participle ends with -ED (just like the simple past). Irregular verbs have a special past participle form that you have to learn. Here are the rules, using the regular verb "arrive" and the irregular verb "eat":

<table>
<thead>
<tr>
<th>Subject</th>
<th>HAVE</th>
<th>Past Participle</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>have</td>
<td>arrived</td>
</tr>
<tr>
<td></td>
<td></td>
<td>eaten</td>
</tr>
<tr>
<td>You</td>
<td>have</td>
<td>arrived</td>
</tr>
<tr>
<td></td>
<td></td>
<td>eaten</td>
</tr>
<tr>
<td>He</td>
<td>has</td>
<td>arrived</td>
</tr>
<tr>
<td></td>
<td></td>
<td>eaten</td>
</tr>
<tr>
<td>She</td>
<td>has</td>
<td>arrived</td>
</tr>
<tr>
<td></td>
<td></td>
<td>eaten</td>
</tr>
<tr>
<td>It</td>
<td>has</td>
<td>arrived</td>
</tr>
<tr>
<td></td>
<td></td>
<td>eaten</td>
</tr>
<tr>
<td>We</td>
<td>have</td>
<td>arrived</td>
</tr>
<tr>
<td></td>
<td></td>
<td>eaten</td>
</tr>
<tr>
<td>They</td>
<td>have</td>
<td>arrived</td>
</tr>
<tr>
<td></td>
<td></td>
<td>eaten</td>
</tr>
</tbody>
</table>

Note that the subject and auxiliary verb may be contracted: "I have" becomes "I've", "She has" becomes "She's", and so on.
How to make the past participle form

With regular verbs, the past participle is the same as the simple past. You can form it by adding -ED to the end of the verb. (See Forming the Simple Past (Regular Verbs) for more information on this.) However, with some verbs, you need to add -EN or change the verb itself. There are no real rules for this; you just need to learn the verbs which are irregular. Sometimes the past participle is the same as the simple past, and sometimes it isn't. Here are four main categories of verbs with examples. Please note that there are many different ways to form past participles; this is just a small sample:

<table>
<thead>
<tr>
<th>Category</th>
<th>Present</th>
<th>Simple Past</th>
<th>Past Participle</th>
</tr>
</thead>
<tbody>
<tr>
<td>Verbs which don't change</td>
<td>cut</td>
<td>cut</td>
<td>cut</td>
</tr>
<tr>
<td></td>
<td>hit</td>
<td>hit</td>
<td>hit</td>
</tr>
<tr>
<td></td>
<td>fit</td>
<td>fit</td>
<td>fit</td>
</tr>
<tr>
<td>Verbs which change their vowel</td>
<td>put</td>
<td>put</td>
<td>put</td>
</tr>
<tr>
<td></td>
<td>sit</td>
<td>sat</td>
<td>sat</td>
</tr>
<tr>
<td></td>
<td>drink</td>
<td>drank</td>
<td>drank</td>
</tr>
<tr>
<td>Verbs which add -EN</td>
<td>break</td>
<td>broke</td>
<td>broken</td>
</tr>
<tr>
<td></td>
<td>eat</td>
<td>ate</td>
<td>eaten</td>
</tr>
<tr>
<td></td>
<td>take</td>
<td>took</td>
<td>taken</td>
</tr>
<tr>
<td>Verbs which change completely</td>
<td>catch</td>
<td>caught</td>
<td>caught</td>
</tr>
<tr>
<td></td>
<td>bring</td>
<td>brought</td>
<td>brought</td>
</tr>
<tr>
<td></td>
<td>teach</td>
<td>taught</td>
<td>taught</td>
</tr>
</tbody>
</table>

Using the Present Perfect Tense

Introduction

The present perfect tense is common in English. It is used for many different functions. This page will explain the most important uses of the
present perfect tense.

Use 1: Actions which started in the past and are still continuing

The present perfect is often used for an action which started at some time in the past, and are still continuing now. Often, the words for (with a length of time) and since (with a starting time) are used along with the present perfect.

He has lived in Canada for five years.

(He started living in Canada five years ago, and he's still living there now.)

She has worked at the University since 1994.

(She started working at the University in 1994, and she's still working there now.)

Use 2: Actions which happened at some unknown time in the past

Sometimes, it's important to say that something happened (or didn't happen), but it's not important (or not known) when it happened. In this case, we can use the present perfect too. In this case, we often use the words already, yet, ever or never along with the present perfect. These words usually go before the past participle in the sentence.

I've already seen that film. I don't want to see it again.

(It doesn't matter when I saw it.)
Have you ever been to Germany?

(It doesn't matter when you went -- I just want to know whether you have been there or not.)

Use 3: Actions which happened in the past, but have an effect in the present

This use is a little more difficult than the other two. In this case, the action happened at some time in the past, but the effect of the action is still important now. It's easiest to understand this use if we compare present perfect sentences with simple past sentences.

<table>
<thead>
<tr>
<th>Tense</th>
<th>Sentence</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Present perfect</td>
<td>I've lost my keys</td>
<td>I haven't found the keys yet -- they're still missing.</td>
</tr>
<tr>
<td>Simple past</td>
<td>I lost my keys yesterday</td>
<td>I've probably found them again already.</td>
</tr>
<tr>
<td>Present perfect</td>
<td>She's broken her arm</td>
<td>The arm is still injured.</td>
</tr>
<tr>
<td>Simple past</td>
<td>She broke her arm</td>
<td>The arm is probably OK by now.</td>
</tr>
</tbody>
</table>
